

Academic Highlights

- **Neuroscience and Behavioral Biology** (NBB), one of the most innovative programs of its kind in the U.S., offers undergraduates a unique opportunity to explore the frontiers of biological and brain sciences—a field that is growing at an exponential rate and making a great impact on society.
- **The English Department** is rapidly making Emory *the* place to go for the study of African-American Literature thanks to an impressive holding in Special Collections and a stellar faculty—including recent hire Kevin Young (award-winning poet and recipient of a 2003-04 Guggenheim Fellowship).
- **The Center for Health, Culture and Society** provides a meeting ground for social and health scientists, humanists and health professionals—as well as an exciting undergraduate curriculum. Emory undergraduates can take full advantage of the campus's proximity to CDC, CARE, Carter Center, American Cancer Society and the Rollins School of Public Health.
- **Theater Emory** offers undergraduates unique opportunities to work alongside professional directors, actors, designers, choreo-graphers, playwrights (including winners of Nobel, Pulitzer and Tony awards) while developing, designing and producing both new and classic works.
- **On Recent Discoveries by Emory Researchers** (ORDER) is a freshman seminar course that focuses on important research findings made here at Emory. Scientists responsible for groundbreaking research projects meet with students to share deeper insights into the scientific process.
- **The Ellman Lectures in Modern Literature** bring distinguished writers to Emory to present a series of literary talks around a theme of their own choice. In spring 2006, Peruvian writer Mario Vargas Llosa will discuss the literary figures who have been most meaningful to him. Previous speakers have included novelists Salman Rushdie and A. S. Byatt.
- **The Music Department** offers something for everyone: opportunities to study and perform music (as a major or nonmajor) under the guidance of a distinguished faculty of performers, composers, and scholars; and a world-class concert hall—for performers and audiences—in the Donna and Marvin Schwartz Center for Performing Arts.

Notable Faculty

Here are just a few of the distinguished faculty who contribute to the undergraduate experience at Emory College.

Frans deWaal, Charles Howard Candler Professor of Psychology, director of the Living Links Center at Yerkes National Primate Center and a member of the National Academy of Sciences, has been widely recognized for writing books aimed at both the scientific community and the general public, prompting comparisons to such famed animal researchers as Jane Goodall and Nobel laureate Konrad Lorenz. His latest book is *Our Inner Ape* (2005).

Sander Gilman, Distinguished Professor of the Liberal Arts and Sciences, is the author or editor of over 70 books. His more notable works include *Fat Boys: A Slim Book* (2004), *Smoke: A Global History of Smoking* (2004), *Jewish Self-Hatred* (1986) and *Seeing the Insane* (1982). He is a former president of the Modern Language Association. One of Professor Gilman's ongoing projects involves developing a collective history of dieting with a class of graduate and undergraduate students.

Only at Emory can you attend Professor Merle Black's class in the morning and see him on CNN in the evening—providing expert analysis on today's top political stories. Only at Emory can you work alongside a world-renowned leader in AIDS research, Professor Dennis Liotta, who recently co-discovered an anti-HIV drug that has revolutionized the fight against this deadly disease—then negotiated the sale of the drug at a no-profit price in developing countries.

Cristine Levenduski, Senior Associate Dean, Faculty

Jim Grimsley, senior resident fellow in creative writing and director of the creative writing program, received the American Academy of Arts and Letters 2005 Academy Award in Literature. As an AAAL award winner, Professor Grimsley joins a select company of writers that includes such luminaries as James Baldwin and Annie Dillard. His 1998 novel, *My Drowning*, earned him the Georgia Author of the Year for fiction.

Leslie Harris, associate professor of history and African American studies, associated faculty in Women's Studies, and chair of the Department of African American Studies, won the Wesley-Logan Prize of the American Historical Association and the Association for the Study of African American Life and History for her first book, *In the Shadow of Slavery: African Americans in New York City, 1626-1863*. Professor Harris has lectured widely on slavery and African Americans in New York City history, and was an historical consultant to the landmark exhibition "Slavery In New York" at the New-York Historical Society.

John Anthony Lennon (professor of music), **Larry Barsalou** (professor of psychology), **Kristin Mann** (associate professor of history), **Sarah McPhee** (associate professor of art history) and **Natasha Trethewey** (associate professor in creative writing) have been recognized for their unique scholarly contributions with the distinguished Guggenheim Fellowship.

Deborah Lipstadt, Dorot Professor of Modern Jewish and Holocaust Studies and director of the Institute for Jewish Studies, is the 2005 winner of the AI Chernin Award given by the Jewish Council for Public Affairs to the person who best exemplifies protection of the First Amendment. In January 2005, Professor Lipstadt was asked by President George W. Bush to represent him as a member of the official American delegation to the 60th anniversary of the liberation of Auschwitz. Her latest book is *History on Trial: My Day in Court with David Irving* (2005).

David Lynn, Asa Griggs Candler Professor of Chemistry and Biology, is an internationally recognized researcher and teacher in the areas of molecular recognition, bio-organic chemistry and chemical biology. He was recently selected as one of twenty inaugural Howard Hughes Medical Institute (HHMI) professors to receive \$1 million over four years to bring scientific research into undergraduate classrooms.

Patricia Marsteller, senior lecturer in biology and director of the Center for Science Education, is widely regarded as one of the most innovative teachers on campus. She teaches undergraduate courses on physiology, evolution, interdisciplinary science, scientific attitudes, women and science, and minority issues in biomedical research. Professor Marsteller also directs efforts to enhance undergraduate science education.

Laura Otis, who holds a joint appointment in the Department of English and the Institute of the Liberal Arts, received a MacArthur Fellowship ("genius grant") in recognition of her creative work and bright future in the study of literature and science. Professor Otis, whose academic career has spanned neuroscience and comparative literature, teaches a freshman seminar class on the history of science.

Eric Weeks (associate professor of physics), **Donna Maney** (assistant professor of psychology) and **Joseph Henrich** (assistant professor of anthropology) have been awarded Presidential Early Career Awards for Scientists and Engineers, the highest honor given to professionals in the early stages of an independent research career.

Drew Westen, who holds a joint appointment as professor of psychology and of psychiatry and behavioral sciences, is both a clinician and an active researcher and teacher. He has written upwards of 100 scientific papers and two books and is currently engaged in research on the classification of personality pathology in adolescents and adults. Professor Westen teaches introduction to psychology—and periodically serves as a commentator for "All Things Considered" on National Public Radio.

Want a research experience that will set your academic record apart—and give you the benefits of building a meaningful partnership with a faculty mentor? Emory College offers undergraduate research experiences that invite students to work on projects alongside experienced scholars.

At Emory you'll know the best of both worlds—the excellent teaching and personal engagement of a leading liberal arts college and the ground-breaking discoveries of a major research university. Add to this promise our location in one of the most vibrant, diverse and historically rich cities in the country and you will enjoy educational, social and cultural opportunities that are simply not available elsewhere.

Robert Paul, Dean, Emory College

Scholarly Inquiry and Research at Emory (SIRE) promotes undergraduate research projects by arranging faculty-student partnerships, grants and summer stipends. Students get a chance to work on significant research projects with internationally recognized experts and experienced graduate students, gaining an insiders' look at the world of research. The Summer Undergraduate Research Program at Emory (SURE) allows undergraduates to conduct supervised research with a faculty mentor over the course of a summer. SURE students receive training in the methods applicable to their research plan, in analyzing their data and

in creating written and oral presentations of their results. Both SIRE and SURE programs allow students to take full advantage of Emory's strengths as a liberal arts college in the heart of a major research university.

How does a semester in Spain sound? How about a summer studying Tibetan philosophy and culture in Dharamsala—home of the Dalai Lama and Emory's one-of-a-kind Tibetan Studies Program? Or a choice of science-study-abroad programs such as chemistry classes in Siena, Italy, and environmental studies classes in Queensland, Australia? Emory offers 79 study-abroad programs in 26 countries, including training in 16 languages. Nearly half of our students have some international experience by graduation, placing Emory in the top 15 of U.S. research universities. The Center for International Programs Abroad (CIPA) is dedicated to fulfilling Emory's commitment to internationalization through study abroad. In collaboration with faculty, CIPA develops, promotes and administers programming for undergraduate students that encourages both intellectual and personal growth through challenging scholarship and cultural immersion. Its services support students and faculty before, during and after the study abroad experience.

Want to learn the ins and outs of college life early on in your academic career? And help discovering your special niche at Emory? Freshman Advising and Mentoring at Emory (FAME) delivers first-rate academic advising and prepares incoming students for a unique college experience at Emory. The program brings together faculty, staff and student leaders to mentor first-year students in small group settings. While these leaders can answer almost any question first-year students have, they can also introduce students to important campus resources that will support their academic success.

Want to make a difference in the community—and have broad, deep resources at your disposal to do so? Through academic courses, research programs and service projects, the Office of University-Community Partnerships (OUCP) connects Emory students, faculty and staff with community-based groups, nonprofit organizations, private businesses and government agencies to address important community concerns. In addition to supporting academic-based service learning and encouraging student volunteer service activities, OUCP stimulates community dialogue about strategies for resolving issues of critical importance to the Atlanta region.

From orientation to graduation, our attention to the student experience ranks second to none. Our core academic support programs ensure that every undergraduate gets the sound advising and mentoring they need, while our innovative learning programs deliver on a growing demand for intensive and independent research opportunities. At Emory we're deeply committed to combining learning and living in ever more transformative ways.

Tom Lancaster, Senior Associate Dean, Undergraduate Education

Want to raise your voice? Emory's Barkley Forum Debate Team has won three national championships since 1995, has ranked in the Top 20 in the National Debate Tournament since 1988, and has been number one since 1997. The Barkley Forum, named after former United States Vice President and College alumnus Alben W. Barkley, is Emory's intercollegiate debate and forensics organization. The Forum participates in numerous civic activities, honors public responsibility, supports debate in middle schools and high schools and is the principal founder of the Urban Debate Leagues, a growing national education reform movement to bring interscholastic debate opportunities to previously under-served schools.

With 40 departments, 70 interdisciplinary research centers, 66 majors, 53 minors, 17 joint concentrations and over 4,000 course offerings each semester, you're sure to find an academic home that feeds your creative fires. Better still, you'll be at the center of an intellectual community whose formal partnerships rival any in higher education—with connections to organizations like the Carter Center and the Centers for Disease Control and to figures like the Dalai Lama and Archbishop Desmond Tutu.

Kim Loudermilk, Senior Associate Dean, Academic Planning
