Fellows participate in intensive three-week educational programs located in cities across Europe and the United States, with approximately 20 local and international students in each program. Each program provides a site-specific curriculum for understanding the historical and cultural context in which challenges to pluralism and liberal democracy occur. The programs are interdisciplinary, collaborative, and engaged learning experiences; they feature lectures and discussions with researchers, journalists, politicians, activists, and artists, as well as site visits to government agencies, non-profit and community organizations, museums, and cultural and memorial sites. The goal of these programs is to foster cross-cultural understanding and an appreciation of different perspectives and approaches for assessing past and contemporary social justice issues.

For the next few months, through individual Action Projects, HIA Fellows apply their new knowledge and perspectives in their own communities. Action Projects are as diverse as Humanity in Action Fellows. In the past, Fellows organized lectures, developed podcasts or brought people together through art performances or discussion tables. Planning for the Action Project begins during the in-person program. After the program, Fellows will be assisted by their local Humanity in Action offices.
